PROFESSIONAL SUMMARY

Senior Android & Flutter Developer with 6+ years of experience building scalable, production-grade mobile applications across fintech, cinema booking, hyperlocal, investment, and enterprise domains. Delivered 25+ production applications using Kotlin, Java, and Flutter for Android and iOS. Experienced in leading cross-functional teams, architecting scalable mobile solutions, integrating payment gateways and third-party SDKs, and owning the complete application lifecycle from requirements gathering to Play Store and App Store releases. Strong expertise in MVVM, Clean Architecture, Jetpack Compose, Flutter, and performance optimization.

TECHNICAL SKILLS

Languages: Kotlin, Java, Dart
Mobile Platforms: Android (Native), Flutter (Android & iOS)
Architecture: MVVM, Clean Architecture, Repository Pattern, SOLID principles
Android Development: Android SDK, Navigation Component, View Binding, CameraX, WorkManager, Product Flavors, Paging 3
Jetpack Compose: Material 3, Compose Navigation, State Hoisting, LaunchedEffect, SideEffect
Dependency Injection: Hilt
Concurrency: Coroutines, Flow, LiveData
Database & Storage: Room, SQLite, DataStore, Hive
Networking: Retrofit, OkHttp, Dio, REST APIs, Deep Links, Deferred Deep Linking, AppsFlyer
Flutter Ecosystem: BLoC (Cubit), Provider, GetX, GoRouter
Firebase: Firebase Cloud Messaging (FCM), Firebase Analytics, Firebase Crashlytics
Payments & Integrations: PhonePe, Razorpay, Paytm, In-App Purchase, AdMob
Hardware / Kiosk: SUNMI Printer SDK, USB Host API, POS Device Integration, Kiosk Application Development
Security: AES, RSA, MD5, SHA-256, Base64, ProGuard / R8, Flutter Secure Storage
Maps & Location: Google Maps SDK, Google Places API
Tools: Android Studio, Visual Studio Code, Git, Bitbucket, GitHub, Firebase Console, Postman, Xcode

PROFESSIONAL EXPERIENCE

Senior Mobile Developer — Android & Flutter | Premitivekey | Mumbai *Apr 2024 – Mar 2026*

- Led Android and Flutter development across fintech, cinema booking, investment, and hyperlocal applications.
- Reduced crash rates by **30%** through performance optimization, Crashlytics monitoring, and code improvements.
- Led sprint planning, task allocation, code reviews, and coordinated with QA, UI/UX, backend teams, and clients.
- Integrated payment gateways, POS systems, Firebase, and third-party SDKs while managing Play Store and App Store releases.

Senior Android Developer — Android & Flutter | Premitivekey | Mumbai *Dec 2022 – Mar 2024*

- Developed production-ready Android and Flutter applications across multiple business domains.
- Built scalable applications using MVVM, Hilt, Coroutines, Flow, Retrofit, and Jetpack Compose.
- Integrated AppsFlyer, payment gateways, POS systems, deep links, and third-party SDKs.
- Collaborated with product, QA, design, and backend teams to deliver stable releases.

Android Developer | **Coreocean Solutions** | Thane *Dec 2020 – Sep 2022*

- Developed **15+** Android applications for government and private sector clients.
- Implemented Firebase, payment gateways, REST APIs, and background services.
- Improved application security and performance using ProGuard/R8 and secure API communication.

Junior Android Developer | **S-IT Infotech** | Navi Mumbai *Nov 2019 – Oct 2020*

- Developed Android features, integrated REST APIs, and built reusable UI components.
- Fixed bugs, improved performance, and supported production releases.
- Built a strong foundation in Android architecture and modern development practices.

KEY PROJECTS

Play Cinema – Android Kiosk App | *Nov 2024 – Mar 2026*

- Developed a self-service Android kiosk application for cinema ticket booking deployed across live theaters.
- Implemented movie browsing, showtime & seat selection, and food & beverage ordering workflows.
- Integrated USB POS devices and the SUNMI Printer SDK for secure card payments and automatic ticket printing.
- Secured payment transactions using AES, RSA, MD5, SHA-256, and Base64 encryption.

Sadhan – Investment & Mutual Fund App | *Sep 2022 – Feb 2025* | *Play Store ↗*

- Developed a stock trading and mutual fund investment app using Kotlin, MVVM, Coroutines, and Flow.
- Implemented digital KYC, bank verification, nominee management, document upload, and CameraX-based video KYC.
- Developed portfolio tracking and market insights features using REST APIs.
- Added multi-language support to improve accessibility and user experience.

Localkhoj – Hyperlocal Deals Platform | *Oct 2023 – Nov 2025*

- Developed **4 production apps** (2 Native Android, 2 Flutter iOS) for consumers and local businesses.
- Implemented location-based search for nearby offers, events, and businesses using Google Maps & Places API.
- Built service request workflows with image uploads, business responses, and customer coordination.
- Developed business features including CRM, promotional offers, digital business profiles, websites, and digital business cards.
- **Published Apps:** Consumer Android ↗ · Business Android ↗ · Consumer iOS ↗ · Business iOS ↗

Jaldicash – Fintech Payment Platform | *Jan 2023 – Nov 2023*

- Maintained and enhanced a legacy FinTech application, resolving critical issues in the AEPS (Aadhaar Enabled Payment System) module.
- Implemented AES, RSA, SHA-256, and Base64 encryption for secure financial transactions.
- Improved application stability through bug fixes, error handling, and performance optimization.

EDUCATION

B.Sc. Computer Science | Sanpada College of Commerce & Technology | 2017
